

## Racks, Cabinets and Accessories

### Racks, Cabinets and Accessories

Alloy is a distributor of superior server racks, cabinets and accessories as well as networking cables and communications products for housing your valuable data equipment. Our range has been designed for a variety of applications whether in a data centre or in a stand alone environment. The KB Series is available in 45RU configurations including 800mm, 1000mm and 1200mm depths, so it will house most servers on the market today without overcrowding. Coupled with its steel mesh doors, built-in cooling fan and spacious design, the unit maintains excellent air flow for maximum cooling of precious server hardware.

Our large selection of accessories improve the quality of your existing rack and cabinet. These accessories will enable you to expand your cabinets' usage and life span by adding extra shelves and drawers to handle any additional computer hardware you wish to install. Alloy Computer Products range will give you the option to grow with your expanding business.

RTE6A42

### KB Series key features
