**Topic / Issue:** DHCP problems when running WEP- WLB2454AP-S

---

**Written By:** Scott Young

---

The following technical article explains the procedure to allow wireless clients to receive an IP address from a DHCP server operating on a fixed LAN when running WEP.

To overcome this problem please ensure that you have done the following:

- 1) **The Deny Unencrypted Data check box is checked, and**
- 2) **The Authentication Type is set to Both**

---

**Summary:**  
(If required)
