Topic / Issue: How to reset the WDS2454AP/AP-A5 to Factory Default

Written By: Scott Young

The following technical article explains how to reset the unit to it's default configuration:

With the power still plugged into the WDS2454AP hold down the reset button on the back of the unit for 10 seconds.

The WLAN LED will now turn off, once the LED has come back on the unit has been reset to it's factory settings.

The factory default settings are:

IP Address: 192.168.1.100

Subnet Mask: 255.255.255.0

The reset button can also be used to reset the unit if it happens to lock up.
To perform this operation just simply press the reset button once.
