

RECLAIM CONTROL

Of Your Mobile Devices

SECURE MANAGE TRACK
ANDROID iOS DEVICES
EASY AFFORDABLE
3CX MOBILE DEVICE MANAGER

3CX Mobile Device Manager allows you to reclaim control over mobile devices and reduce the risk of corporate data loss without sacrificing employee productivity. 3CX MDM monitors and manages both company and employee-owned devices, ensuring compliance with corporate security policies.

10 Benefits of 3CX Mobile Device Manager

1. Affordable mobile device management at last!
2. Easy to use, purchase and scale
3. Hosted and onsite versions
4. Unparalleled Android manageability
5. Remote lock and wipe
6. Enforce corporate password policies
7. Find, track and view full location history
8. Monitor for malware and inappropriate apps
9. Mass deploy, whitelist, blacklist apps
10. Configure email & Wi-Fi settings remotely

- Prevent corporate data loss by remote locking and wiping your mobile devices when lost and enforcing password policies.
- Provide feature rich corporate email with control over stored attachments and mail.
- Manage installed apps and ensure productivity and security.
- Track mobile devices and log location history.
- Configure Wi-Fi & device settings remotely.
- Remote control Android devices.

With 7 million dollars' worth of mobile phones being lost every day in the United States and over 300 devices being stolen in London each day, businesses can't afford to have sensitive data fall into the wrong hands!

Securing Your Data – Remote Lock or Wipe Devices

If a device is lost or stolen, 3CX Mobile Device Manager can remotely lock or wipe the device and its SD card to avoid unauthorized use, even if it isn't connected to the internet, or just delete corporate email and any stored attachments. Enforce a strong password policy remotely and set minimum password length and time lapse before device auto-lock.

Manage Apps - Monitor for Rogue Apps & Mass Deploy

Administrators can review all the apps that are installed on the devices from a single screen and remove any inappropriate apps that affect employee productivity and drain data plans with a few mouse clicks. Mass Deploy corporate apps to devices without using the Appstore or Google Play.

Find & Track Devices & Supervise Staff Routes

3CX Mobile Device Manager stores the current location of all devices and keeps detailed logs of where the devices and employees have been. All device locations are shown with their full address using Google Maps.

Unparalleled Android Manageability

Remote Control

3CX Mobile Device Manager allows administrators remote control of Android smartphones and tablets to manage files on the devices remotely, launch commands and more.*

Remotely Configure Corporate Email

3CX Mobile Device Manager incorporates the most popular commercial Android email client - Aqua Mail, allowing administrators to remotely configure corporate email and retain control of stored attachments and mail. Administrators can delete corporate email only without performing a full wipe! Companies can provide a seamless user experience for email across different Android devices. 3CX provides Enterprise-style features for SMBs - at a fraction of the cost and administration effort!*
