SIP Call Button

CyberData
The IP Endpoint Company

This device is mounted under a desk or in a discrete location. If an event takes place, the user depresses the button. The Call Button automatically makes a call to a pre-set phone or extension number. When the called number answers, the Call Button plays and repeats a stored audio file. This stored audio file is uploaded by the administrator to meet the needs to the installed location.

Features

- User downloadable message up to 80 seconds
- Single button call to pre-set number
- Continuous repeat of message
- Call progress light
- Event-controlled relay
- Tamper sensor
- Web-based setup
- PoE-powered

Use areas include:

- Classrooms
- Banks or financial institutions
- Court rooms
- Front lobby reception areas
