VidyoOne+™

Jumpstart Team Collaboration

The VidyoOne+ package delivers enterprise-class VidyoConferencing in a single bundled solution. Designed to get you and your team collaborating rapidly, it comes with the Vidyo infrastructure and client software needed to connect people from mobile, desktop, and room systems including third party systems. Deployed as virtual machines, VidyoOne+ can be easily managed within your existing virtual environment. VidyoOne+ comes with support for up to 10 concurrent connections and can be upgraded to 20 as your needs increase. VidyoOne+ delivers the uncompromised performance and exceptional user experience that only Vidyo technology can deliver, with support for up to 4K video and content, security through encryption, built-in firewall and NAT traversal, and interoperability with H.323 and SIP.

Key Features

Incredible User Experience

- Click-to-connect simplicity plus built-in calendaring support

- Experience up to 4K quality video and shared content

- Interoperability with third party H.323 and SIP based systems

- Connect from any desktop or mobile device including Mac, Windows, Linux, iOS and Android

- Superior performance over the public Internet and wireless with patented dynamic adaptation technology

Easy to Deploy and Manage

- Virtual appliance for easy deployment in your data center, colocation facility or in the cloud

- Web-based interface simplifies administration, configuration and maintenance

- Secured media and signaling encryption

- Automatic firewall and NAT traversal

Content Sharing and Collaboration

- Shared content at native resolution up to 4K

- Annotation and whiteboard support with VidyoSlate™

- Supports multiple simultaneous content shares between Vidyo endpoints

- Content share with H.323 and SIP systems using H.239 and BFCP
