Installing PCCOM at Windows 2000 (V2.11)

1) Run the Setup program. If you have the old driver installed on your computer remove it first before running the Setup program of the latest driver.

2) To see if you have the latest driver, Go to the control panel then open the"Decision PCCOM Adapters".

At the "Device Details" frame you have to see

PCCOM Device Driver Configuration
V2.11

If you do not have the latest driver Please request for the latest version.

3) Shut down your PC and insert the PCCOM Card.
  Turn on your PC.

Shut Down Windows

Microsoft Windows 2000 Professional

What do you want the computer to do?

Shut down

Ends your session and shuts down Windows so that you can safely turn off power.

OK   Cancel   Help

   Please note that PCI cards will be autodetected when being installed into your computer. You have to configure ISA-based cards manually using the configuration utility applied.
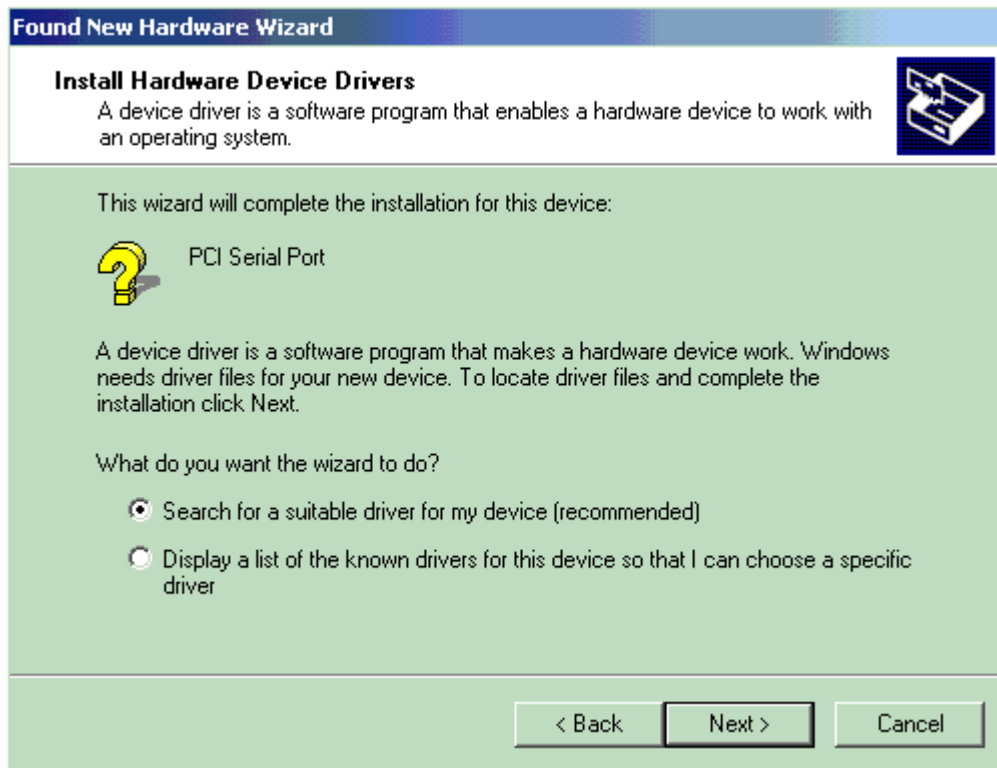

Installing PCCOM PCI Card

1) Installing PCCOM PCI Card will display the "Found New Hardware" dialog box and will run the "Found New Hardware Wizard"

   At Found New Hardware Wizard Next button.

2) At the What do you want the wizard to do, select "Display a list of the known driver"
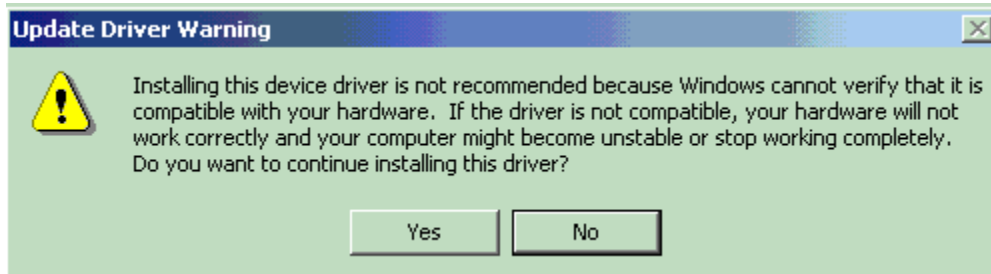

3) At the Hardware Type, select Multi-port serial adapters then click the Next button

4) At the Manufacturers: select Decision Computer Int'l and at the Models: select the PCCOM 8 Port then click the Next button

5) At the Update Driver Warning click the "Yes" button.

Update Driver Warning

Installing this device driver is not recommended because Windows cannot verify that it is compatible with your hardware. If the driver is not compatible, your hardware will not work correctly and your computer might become unstable or stop working completely. Do you want to continue installing this driver?

Yes   No

6) At the Start Device Driver Installation click the "Next" button.

Found New Hardware Wizard

Start Device Driver Installation
The device driver will be installed with the default settings.

The wizard is ready to install the driver for the following hardware device:

PCCOM 8 Port

Windows will use default settings to install the software for this hardware device. To install the software for your new hardware, click Next.

< Back   Next >   Cancel

7) When the dialog "Digital Signature Not Found" click the "Yes" button

Digital Signature Not Found

The Microsoft digital signature affirms that software has been tested with Windows and that the software has not been altered since it was tested.

The software you are about to install does not contain a Microsoft digital signature. Therefore, there is no guarantee that this software works correctly with Windows.

PCCOM 8 Port

If you want to search for Microsoft digitally signed software, visit the Windows Update Web site at http://windowsupdate.microsoft.com to see if one is available.

Do you want to continue the installation?

| Yes | No | More Info |

8) At the "Completing the Found new Hardware Wizard" click the "Finish" button.

9) To configure the card go to the control panel then open the "Decision PCCOM Adapters".
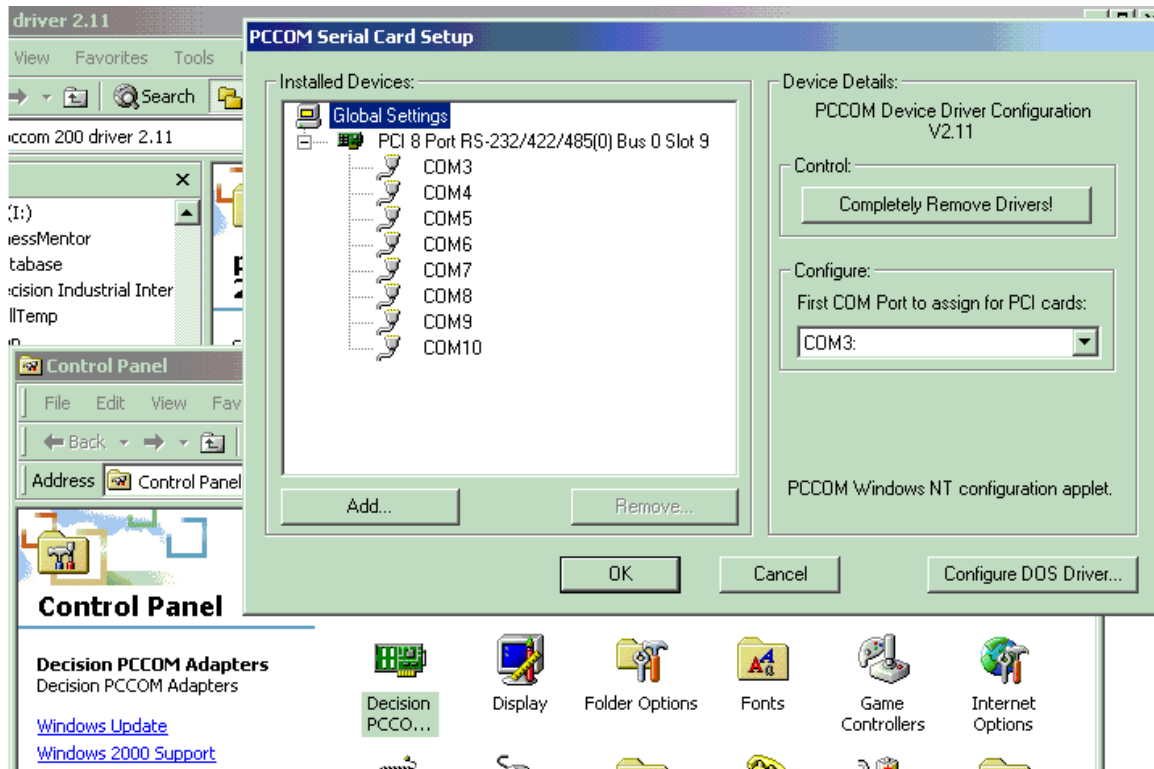

Further information, please run the Decision PCCOM Control Panel applet, check the manual or contact your local distributor.
