Release Note QX50/QX200 6.1.45 Edition 1

1   Introduction

This Release Note describes hardware and firmware requirements to use with the

QX50/QX200 firmware 6.1.45 Date: March 23, 2017

Additional enhancements, bug fixes and known issues incorporated in this firmware will be listed as known.

Date: March 24, 2017

2   Requirements

2.1   Hardware Requirements

- The firmware (FW) can be used on QX200 and QX50 models only.
- The model name is written on the front plate of the unit; the unit number is on the bottom label.

2.2   Firmware Requirements

Attention: The firmware upgrade to **6.1.45** can **ONLY** be done from 6.0.2 and higher versions.

2.3   Supported IP Phones

Listed below are the Epygi Supported IP phones with the corresponding software (firmware) versions that are tested and recommended for use with QX50/QX200 FW 6.1.45. All the phones in this list can be automatically configured to work with QX50/QX200 FW 6.1.45.

Note:

- QX50/QX200 FW 6.1.45 supports also the Plug-and-Play (PnP) option for most IP phones. The configuration options for each specific IP phone are described in detail in the Configuring Epygi Supported IP Phones guide.
- Any known issues and limitations regarding the usage of the QX50/QX200 FW 6.1.45 telephony services and features for each IP phone described in detail in the QX IP PBX Features on Epygi Supported IP Phones guide.

Vendor	Model	SW/FW Version	PnP Support
Akuvox	SP-R53P	53.0.1.23	Yes
Alcatel	IP2015 (IP15)	1.0.7A-0	No
Alcatel	Temporis IP100	1.0.6A-0	No

Yealink	W52P	25.30.0.20	Yes

2.4 Interaction with Other Epygi Software Releases

Use the latest SW and FW versions for other Epygi products to achieve maximum compatibility with **QX50/QX200 FW 6.1.45**:

- **QXISDN4**, **QXE1T1** or **QXFXO4** gateways used in the shared mode should have FW 6.1.17 or higher.

- **QXFXS24** should have FW 6.1.40 or higher for PnP configuration.

- **Auto Dialer** SW 1.0.11 or higher should be used.

- **Desktop Communication Console** (DCC) SW 1.18 or higher should be used.

- **iQall** (IOS application) version 1.1.0 and **iQall** (Android application) version 1.0.4 or higher should be used.

- **Epygi Hotel Console (EHC)** SW 1.0.7 or higher should be used.

- **Epygi Media Streamer (EMS)** SW 2.4 or higher should be used.

- **HotCall Add-In** SW 2.5 or higher should be used.

- **HotKeyCall** SW 1.14 or higher should be used.

- **Bulk User Extensions Importer Tool** version 1.0.16 or higher should be used.

- **QX-Quadro Configuration Console** (QCC) SW 2.2 or higher should be used.

- **CallControl Pack** SW 5.8.0 or higher should be used.

- To use QX50/QX200 FW 6.1.45 with a **3PCC** or **Click2Dial** application, the **3pcc/Click2Dial Access Allowed** checkbox should be enabled for each extension using this feature.

Important Note: QX50/QX200 FW 6.1.2 and higher are not compatible with ACD Service and Statistics Monitoring and Reporting (SMR) system. The replacement for **SMR** is the **Epygi ACD Console (EAC)** web application. **EAC** requires a software license key.

3 New Features

The table below indicates a high-level list of new features that have been added beginning with the most recent QX50/QX200 FW release.

Release	New Features
6.1.45	Added PnP and auto configuration support for new **Yealink SIP-T27G**, **SIP-T41S**, **SIP-T42S**, **SIP-T46S** and **SIP-T48S** IP phones.
	Added new **Media Streamer** service allowing to upload and stream uploaded audio files to the RTP destinations from the QX50/QX200.
	Added "**Firmware Version Control**" support for Yealink phones to upgrade or downgrade the phones to the Epygi recommended firmware version.
	Call Recording feature enhancements: • Improved wildcard character support for the **Call Recording** rules. • Added support to move the call recording entry up/down by keeping the checkbox selected.
	Added support allowing to **Restrict Simultaneous Calls** for "SIP" call types.
	GUI improvements and enhancements in the **Extensions Management** page.
	GUI enhancements on the **Menu** bar: • Added device's current Date/Time. • Added device's hostname.
	General improvements and enhancements in the **SIP TLS certificate**.
6.1.41	Added the new **Priority** option in the Redundancy settings, which allows the particular device to always run as a **Master**.
6.1.40	Added PnP and auto configuration support for the new **snom D345** IP phone.
	Added PnP and auto configuration support for the new **Vtech ErisTerminal VSP726** and **ErisTerminal VSP736** IP phones.
	Added auto configuration support for the new **VTech** phones: **ErisTerminal VSP715**, **ErisTerminal VSP725**, **ErisTerminal VSP735** IP phones, **ErisStation VCS754** conference phone and **ErisTerminal VSP 600 (VSP601)** DECT phone.
	Uploading audio files for customizing any of the system or extension audio messages on the QX50/QX200 has been simplified: • Apart from the files in the (***.wav**) format, the system can now accept (***.mp3**) files for uploading as custom messages. • The (***.wav**) and (***.mp3**) files can now be uploaded directly to the system without the need to convert to the proper telephony format. The uploaded files will be automatically converted to the QX supported wav format: (**CCITT u-law, 8 kHz, 16-bit, Mono**).
	Dial & Announce service enhancements: • Added support to allow configuring the repetition count for the **Announcement Message**. • Added support to allow configuring the silence duration between consecutively played **Announcement Messages**.
	GUI improvements and enhancements in the **EAC** application.

Release	New Features
	Added support for the new **Day/Night Switching** service for the Scheduling feature. This service allows the state of the schedules to be manually controlled by either using the MPK keys on the phones or the new feature code ***86**, available also remotely on the QX Auto Attendant. Schedules are assigned Schedule IDs. The **Schedule IDs are assigned** to MPK keys in the **IP Lines→Programmable Keys Configuration** page. **Attention:** After FW update to 6.1.35 the **Schedules** comes up with blank **Schedule IDs**. Thus, the **Day/Night Switching** service won't work until the schedule(s) are updated with a **Schedule ID**. Therefore, after FW update select schedules one by one in the **Telephony→Schedules** page, edit and update with **Schedule IDs**.
	Added PnP and auto configuration support for the new **Yealink SIP-T40P** IP phone.
	Added PnP and auto configuration support for the new **Fanvil X4/X4G** IP phone.
	Added support allowing the QX50/QX200 to act as an **OpenVPN** client.
	Added **OpenVPN** support for the following IP phones: • snom 370, 720, 760, 821, 870, D375, D710/710, D715/715, D725, D765 IP phones and snom MeetingPoint Conference phone. **Note:** OpenVPN support will only work for the phone after applying **small patch firmware** (http://wiki.snom.com/VPN_Support). • Grandstream GXV3240 and GXV3275 Video phones. • QOSIP Q7104/Q7204 IP phone.
	Added **Use OpenVPN Settings** option for **IP Lines Settings**. Select this option when you want to configure IP Phone using OpenVPN settings. **Note:** This option is available only for some phones.
6.1.35	**OpenVPN** enhancements: • Added support to assign static IP address to OpenVPN client. • Added support to disable client connection temporarily without revoking the client certificate. • Added support allowing to route client's traffic through the OpenVPN tunnel.
	Added **Symmetric RTP** option for **IP Lines Settings**. Select this option when the IP phone attached to the IP line is behind the NAT router.
	ACD & **EAC** enhancements: • Added support to display information about the agents logged into EAC on **Extensions→ACD→EAC Status** page. • Added support to terminate the EAC session for the logged in agent(s) from QX GUI. • Added support to display "**Wait Time in Queue**" for each call in EAC. • Added support to select "**Duration Format**" from **EAC→Settings** page for EAC reports.
	Dial & Announce service enhancements: • Added support to allow the **Dial & Announce** service to be automatically activated on a schedule. • Added a new option to interrupt the active call and play an announcement to the users in the dial & announce list. This option is available for **QX extensions** only. • Added **Auto Answer** option to page the extension's IP phone by forcing the phone to go off-hook and play the announcement. This option is available for **QX extensions** only. • Added support to play an announcement through the **Audio Line-out**.
	GUI enhancements for **Voice Mail Settings** and **Profiles for Voice Mail Settings** pages.

Release	New Features
6.1.30	Added PnP support for the **Yealink SIP-T19P E2**, **T21P E2**, **T23G(P)**, **T27P** and **T29G** IP phones. **Note:** PnP option will only work for the phones running **x.80.0.130** or higher firmware.
	Added **EXP20** expansion module support for the **Yealink SIP-T27P** and **T29G** IP phones.
6.1.29	Added PnP and auto configuration support for the new **Yealink SIP VP-T49G** video phone.
6.1.28	
6.1.27	Added PnP and auto configuration support for the new **snom D375**, **D710** and **D765** IP phones.
	Added **snom D7** expansion module support for **snom 720, 760, D715/715, D725** and **D765** IP phones.
	The **Schedules** feature is enhanced to be applicable except of the call routing to the auto attendant scenarios as well.
	GUI enhancements for IP Lines page: • Added support to reboot multiple number of IP Phones at once. • Added support to allow quicker edits when moving between IP Lines. • Added support to allow quicker access to the attached extension's **Admin** and **User** settings.
	The GUI is enhanced to allow quicker access to the extension's **Admin** and **User** settings.
6.1.25	Added support for the **SIP Registration Transport** UDP/TCP/TLS options in the Extension's SIP Registration.
	Added the new **Schedules** feature to define schedules and apply them to the call routing rules. The scheduling allows different scenarios for scheduled periods such as working hours, non-working hours and holidays.
	Added auto configuration support for the new QOSIP Q7104 IP phone.
	Added 3-way conference support for Mitel 6863.
	Added **Push Route to LAN side** option for OpenVPN server configuration.
	The **Universal Extensions Recording** list is updated with the **Find Me/Follow Me Welcome Message,** allowing the message to be configured for all extensions at once.
	The GUI is enhanced to allow quicker edits when moving between extensions. The update is added in the **Extension General Settings** page and also for the **Extension User Settings**, such as the Caller ID based services, voice mailbox, etc.
	Added support to configure the **Forward/Rewind duration** for Recording Box Extension.
6.1.24	Added a new **Dial & Announce** service in the list of Caller ID based services. This service allows simultaneously calling to the predefined list for up to 32 destinations and play the announcement audio message when the destinations answer the call.
6.1.23	Added support (with a license key) for connecting QX50/QX200 to **PMSLINK** middleware from char (software solution partner). This allows integrating the QX50/QX200 with the PMS systems used in hotels.
	Added PnP and auto configuration support for the Grandstream GXV3240 and GXV3275 IP phones.
	Added the new **Reports Scheduling** feature for the **EAC** application that allows the reports to be automatically generated, then stored on an FTP server and/or delivered by e-mail.
	Added a new feature to allow **Call Recordings** from the **EAC** application to be downloaded and played.
	Added the **SSH FTP (SFTP)** support, which allows to send the call recordings and call history archive files to an FTP server using the secure FTP connection.

Release	New Features
	Added **Ignore Push Routes** option for OpenVPN client configuration. If disabled, the client side will accept push route commands from the server side, which allows an OpenVPN client to reach the QX's LAN side.
	Added support to upload a custom logo for the IP phones: Yealink SIP-T19, T19 E2, T21, T21 E2, T23G(P), T27P, T29G, T41P, T42G, T46G, T48G and CP860 conference phone.
	Added a **Collect Call** option for shared ISDN and E1/T1 trunks in the call routing wizard.
	Added a new **Search** option in the QX **Online Help**.
6.1.17	
6.1.15	Added auto configuration support for the new Grandstream GXP1610 and GXP1620/GXP1625 IP phones.
	Added auto configuration support for the new Yealink SIP-T29G IP phone.
	Added PnP and auto configuration support for the new Yealink CP860 Conference phone.
	Added PnP support for the Fanvil X3/X3P and X5/X5G IP phones.
	Added **RTSP** support, which allows live media streaming from RTSP server to the video phones.
	Added **OpenVPN** support for Yealink phones.
	Added the **Disable DND Button** option for Grandstream GXP14xx series, GXP2110, GXP2120 phones in IP Phone templates.
	Added the **Blink message LED on ringing** option for Grandstream GXP110x, GXP116x, GXP140x series and GXP1610 phones in IP Phone templates.
6.1.10	Added auto configuration support for the new Yealink SIP-T19P E2, T21P E2, T23G(P) and T27P IP phones.
	Added **OpenVPN** support, which allows secure point-to-point or site-to-site connections in routed or bridged configurations between the QX50/QX200 and other devices and remote access facilities.
	Added support for the new **Epygi Hotel Console (EHC)** application (with a license key).
	Added new **Alarm** feature. This feature allows to be schedule alarms for each extension. The configured alarm will be automatically activated at the scheduled time.
	Added support for **Barge-In**, **Whisper** and **Listen-In** features from **EAC** web GUI.
	Added **Reporting** feature in the **EAC** application that allows reports to be generated and downloaded in the (***.csv**) format related to the **ACD** statistics and **CDR** records.
	Added support for direct outbound/inbound calls from/to agents along with the ACD call statistics and CDR records for these calls.
	Added a new **ACD Service** in the **Firewall→Management Access** to allow remote access to the **EAC** application from the WAN.
	Added a new **EHC Service** in the **Firewall→Management Access** to allow remote access to the **EHC** application from the WAN.
6.1.5	Added auto configuration support for the new Alcatel Temporis IP100, IP150, IP300, IP700G IP phones and Alcatel IP2015 DECT phone.
	Added PnP and auto configuration support for the new snom D715/715 and D725 IP phones.
6.1.2	Added support for the new **Epygi ACD Console** web application (with a license key), which allows call center agents, supervisors and administrators to monitor the queues and agents, to view call statistics, to chat and to update the agents' status, etc. **EAC** stores and formats the data and produces real-time information and statistical reports on ACD activities.
	Added **Phone Book** support, which allows external contacts to be easily added into the IP phones' Directory.
	Added a new **Recording tool**, which allows system voice messages to be directly recorded from an IP phone.

Release	New Features
	Added auto configuration support for the new Fanvil X3/X3P, X5/ X5G, C400 and C600 IP phones.
	Added PnP and auto configuration support for the new snom M700 base station.
	Added **Play Ringback Tone** option in Find Me/Follow Me (FM/FM), which allows a ringback to be played during the **Welcome Message Delay** and **Audio Wait** period.
	Added a new configuration option in the IP Phone templates to allow the **Record** button functionality for snom phones to be enabled/disabled.
	Added the **Live Dialpad** option for Yealink phones in IP Phone templates.
	Added **Caller ID Source** parameter for Yealink phones in IP Phone templates.
	Added **BLF LED Mode** states to be optioned for Yealink phones (except Yealink SIP-T19P) in IP Phone templates.
	Added an additional option to verify the status for trial and time limited features keys.
6.0.13	Added PnP and auto configuration support for the new Mitel 6863, 6865, 6867 IP Phones.
	Added PnP support for Cisco SPA IP phones: 303, 501, 509 and 525.
	Added MPK configuration support for Cisco SPA IP phones: 303, 501, 509 and 525.
6.0.9	
6.0.8	
6.0.2	

4 Changed Features

The table below provides a high-level list of changed features that have been changed beginning with the most recent QX50/QX200 FW release.

Release	Changed Features
6.1.45	The recommended FW versions have been changed for some **Yealink** phones. For **CP860** from 37.80.0.10 to 37.80.0.30, for **T19 E2** from 53.80.0.130 to 53.81.0.25, for **T21 E2** from 52.80.0.130 to 52.81.0.25, for **T23G** from 44.80.0.130 to 44.81.0.25, for **T27P** from 45.80.0.130 to 45.81.0.25, for **T29G** from 46.80.0.130 to 46.81.0.25, for **T40P** from 54.80.0.130 to 54.81.0.25, for **T41P** from 36.80.0.130 to 36.81.0.25, for **T42G** from 29.80.0.130 to 29.81.0.25, for **T46G** from 28.80.0.130 to 28.81.0.25 and for **T48G** from 35.80.0.130 to 35.81.0.25.
6.1.41	Added the "**Electronic Hookswitch**" option for Polycom IP phones into the **IP Phone Templates**. When you use a headset that supports electronic hookswitch (EHS), you can place, answer, and end calls by using controls on your headset.
6.1.40	Changes in behavior for the **Parent-Child** extensions configuration: • If any of the extensions in the **Parent/Child** group are busy, then entire group will be considered busy, therefore the incoming call will follow the busy state rules (busy forwarding, call queue, VMS, etc.) depending on what is configured. **Note:** If the "**Call Waiting Service**" is enabled on the **Parent** extension, then extensions of **Parent/Child** group will receive the second call. • If all extensions in the **Parent/Child** group are free (not busy) and are ringing, and any of them presses the "**Reject**" button (or somehow declines the incoming call), then the entire group will be considered as busy. Therefore, incoming calls will follow busy state rules (busy forwarding, queue, VMS, etc.) depending on what is configured.

Release	Changed Features
	Added the **Transfer on Conference Hang Up** option for Grandstream IP phones into the **IP Phone Templates**. This allows the conference initiator to be disconnected from the conference while keeping the other two parties in the call.
	Added **MC-Link** as a new carrier to the VoIP Carrier Wizard list.
	Added **Flowroute** as a new carrier to the VoIP Carrier Wizard list.
6.1.35	The recommended FW versions have been changed for some **Yealink** phones. For **C860** from 37.72.0.10 to 37.80.0.10, for **T41P** from 36.72.0.1 to 36.80.0.130, for **T42G** from 29.72.0.1 to 29.80.0.130, for **T46G** from 28.72.0.1 to 28.80.0.130 and for **T48G** from 35.72.0.34 to 35.80.0.130.
	The max number of **Line appearance** has been increased for some **Yealink** phones. For **T29G** from **10** to **16**, for **T41P** from **6** to **10**, for **T42G** from **6** to **12**, for **T46G**, **T48G** and **T49G** from **10** to **16**.
	The recommended FW versions have been changed for some **snom** phones. For **MeetingPoint**, **370**, **821** and **870** from 8.4.35 to 8.7.5.35.
	QOSIP Q7104 IP phone has been renamed to **QOSIP Q7104/Q7204**.
	The recommended FW version has been changed for **QOSIP Q7104/Q7204** from 1.0.3.97 to 1.0.3.98.
	The default **Digitmap** for Polycom phones has been changed. • Added support allowing user to dial out automatically after **Digitmap Timeout**, without pressing **#** sign or **Send** softkey. • Added support allowing to accelerate dial out (don't wait for **Digitmap Timeout**) by pressing **#** sign.
	Programmable key support (DSS Keys) has been increased up to **37** keys for **Fanvil X5/X5G**.
	Hot Desking feature enhanced regarding the voice notifications when login/logout on the public phones: • Added voice prompt asking user to login before using the phone. • Added voice prompt notifying user about login extensions in use. • Added voice prompt informing the user about the successful logging out.
	Added support to allow/deny access to the **Diagnostics** and **Reboot** pages for QX localadmin.
	The **Status→System Status→Memory** page is redesigned and modernized.
	The **Subscriptions Count** section (**Status→System Status→IP Line Registration** page) is enhanced to display correct and informative data for used/allowed subscriptions.
6.1.30	The recommended FW versions have been changed for some **Yealink** phones. For **T19P E2** from 53.80.0.70 to 53.80.0.130, for **T21P E2** from 52.80.0.70 to 52.80.0.130, for **T23G(P)** from 44.80.0.70 to 44.80.0.130, for **T27P** from 45.80.0.70 to 45.80.0.130 and for **T29G** from 46.80.0.70 to 46.80.0.130.
	Added the option to enable/disable the **Welcome Message** in the menus for Auto Attendant **Custom** scenario.
	Changes in Auto Attendant behavior for the **Custom** scenario: • If the **Welcome Message** is not specified, then the Welcome Message for **Standard** scenario will be played. • If the **Recurring Prompt** is not specified, then the Recurring Prompt for **Standard** scenario will be played.
	Enhancement in Auto Attendant for **ACD** scenario: No need to enter **ACD Queue ID** for changing **Agent** status.

Release	Changed Features
	The **EXP38** expansion module support has been discontinued for the **Yealink SIP-T27P** and **T29G** IP phones.
6.1.29	
6.1.28	
6.1.27	The ACD Call Detail Records archiving is removed. The old records will not be archived and removed from EAC, instead they will be moved gently to another database within QX. Thus, allowing to increase the stability and the speed of ACD and EAC systems.
	Enhancements in **ACD Scheduling Reports**: The system will try to send scheduled reports to FTP server or e-mail address periodically in case of failures: 1. 4 attempts within 20 minutes 2. 4 attempts within 4 hours 3. 18 attempts within 72 hours After each period an event will be generated in **Status→System Events** about the failure. If the scheduled reports failed to send within 72 hours, they would be deleted.
	Calls addressed to ACD Agent cannot be intercepted by another agent or extension.
	The recommended FW versions have been changed for some **snom** phones. For **710**, **720** and **760** from 8.7.3.25.9 to 8.7.5.35, for **D715/715** and **D725** 8.7.5.17 to 8.7.5.35.
	Added support to configure **Voice Mail Profiles** when logged in as an **Extension**.
	Added **MO=1** parameter in the **SMS Settings**.
	Added support for the following symbols "<", ">" in the password field for **E-mail Settings**.
	Added support to download Extension's Call Detail Records for Successful, Missed and Unsuccessful Outgoing calls, when logged into the system using extension's credentials.
	Added support to exclude/include different **CDR parameters** in generated CDR reports for the Call and Conference History.
	Added support to display **SRTP** parameters in the Call and Conference History.
	Added **recording_id** as a new **File Naming Scheme** in Recording Storage Settings page.
	The default **Voice Mail Recording Codec** has been changed from **G729a** to **G711u**.
	Added **Fusion** as a new carrier to the VoIP Carrier Wizard list.
6.1.25	**SIP IDS enhancement:** added a special rule in QX firewall configuration to drop the messages, to exclude the load on the system, in case of huge amount of invite messages from the sender's IP addresses. This rule is applied automatically only for the SIP messages (new established UDP and TCP ports), and limits their number according the criteria: max average match rate as 60 message/sec.
	The maximum length of **Connection Name** field for **PPTP** and **L2TP** has been increased up to **64** symbols. Support for the following symbols "@", "-", ".", "_" is added.
	Added support in **Extensions Multiple Editing** for the following fields: **Ringing Simulation** and **Ringing Simulation Timeout** from General Settings page.
	Added an option for each Queue to set the **Wrap-up** timeout for all Agents of that queue in common.
	ACD Agents will not receive calls from other Queues within their Wrap-up timeout. With the exception of Direct Inbound Calls, those will change the Agent status from **Wrap-up** to **Busy**.
	ACD Agent can make and receive direct calls, when his status is set to **Offline**, **Away** or any **User-defined** state.
	Added an option for each Queue to set the ACD Agents status to **Away** if the Agent(s) receives a call and doesn't answer within the **Agent Ring timeout**.
6.1.24	

Release	Changed Features
6.1.23	Added support to download **Call Detail Records** in the (***.csv**) format for Successful, Missed and Unsuccessful Outgoing calls.
	The recommended FW versions have been changed. For **Grandstream GXP2200** IP phone from 1.0.3.25 to 1.0.3.27, for **GXV3140** from 1.0.7.3 to 1.0.7.80 and for **GXV3175** from 1.0.3.22 to 1.0.3.76.
	The voice mail forwarding procedure on the handset is simplified. Now you can skip the accompanying message recording when forwarding a voice mail on the handset. Just press **#** twice quickly when prompted to record the accompanying message.
	Added the new **Clean IP Phone VLAN settings if no VLAN on PBX** option in the generalconfig.cgi hidden page. This option allows to clear or leave unchanged VLAN settings manually configured on the LAN interface of IP phones. • When this option is enabled (default), the system will clear/remove all VLAN settings configured on the LAN interface of IP phones. • When this option is disabled, the system will leave unchanged all VLAN settings configured on the LAN interface of IP phones. **Note:** The system doesn't touch the PC port configuration of the phones.
	ACD Agents can now receive calls from another queue(s) when busy on a call.
	The **Blueface Ireland, Blueface Italy and Blueface UK** carriers have been removed from the VoIP Carrier Wizard list.
6.1.17	Added support allowing to enable/disable entries in the **Authorized Phones**.
6.1.15	The recommended FW versions for Yealink SIP-T19 E2, T21P E2, T23G(P) and T27P IP phones have been changed from xx.80.0.60 to xx.80.0.70.
	The recommended FW versions for Grandstream GXP2130, 2140, 2160 IP phones have been changed from 1.0.3.9 to 1.0.5.23.
	The recommended FW versions for Grandstream GXP1100, 1105, 1160, 1165, 1400, 1405, 1450, 2100, 2110, 2120, 2124 IP phones have been changed from 1.0.6.7 to 1.0.8.6.
	The recommended FW versions for Fanvil X3/X3P and X5/X5G IP phones have been changed from (1.3.221.1531 and 1.3.115.1425) to 1.3.511.1821 accordingly.
	Added **SoTel/VoIPLINK** as a new carrier to the VoIP Carrier Wizard list.
	If the IP phones are configured from VLAN side, the corresponding VLAN cannot be deleted or modified unless the interface for IP phones configuration is changed.
	The user can make calls with clicktodial.cgi either using admin credentials or his own (username/password).
	ACD agent's status will not be changed to Away if he/she is busy with another call and doesn't answer the second call (ACD call).
	ACD agent will not receive a second call from the same queue if he/she is already in the call from the same queue.
	ACD Agents Status Records archiving is removed.
6.1.10	The default option for **Configure IP phones from** changed from **WAN** to **LAN** in the **IP Line Settings**.
	The maximum count for IP Phones trial feature has been changed from **99** to **176** for QX200 and to **32** for QX50.
	Added support in **Extensions Multiple Editing** for the following fields: **Call Barge-In / Intercept Access List** from General Settings page.
	The behavior for the VoIP Carrier Wizard is changed. The new **Authentication by IP Address** checkbox allows bypassing the **Account Name** and **Password** information and filling the **SIP Server** and **SIP Server Port** information only for the carriers not requiring account authentication.
	Added **BINARY NETWORKS** as a new carrier to the VoIP Carrier Wizard list.

Release	Changed Features
	Added **Blueface Ireland, Blueface Italy and Blueface UK** as new carriers to the VoIP Carrier Wizard list.
	Added **IP Directions** as a new carrier to the VoIP Carrier Wizard list.
	Added **MyNetFone** as a new carrier to the VoIP Carrier Wizard list.
	Added **ThinkTel Communications** as a new carrier to the VoIP Carrier Wizard list.
	Kebu.it carrier has been removed from the VoIP Carrier Wizard list.
	Consultative call transfer action has been removed from **EAC→Dashboard** page.
	The old password will not be required when change the **Phone Access Password** for Administrator.
	The **LAN IP address** of the backup configuration displayed in the shell window, while restoring previously backed up configuration file.
6.1.5	**Archive by call records count** maximum is decreased to **3000** in the **Call History→Archiving Settings** for system stability purposes.
	In addition to expiration period the expiration date/time has been displayed for time limited license keys in Licensed features table.
	Added support in **Extensions Multiple Editing** for the following fields: **Password** and **Confirm password** from General Settings page and **Authentication User Name** from SIP Advanced settings.
	No Answer Call Forwarding (NACF) enhancement for FM/FM. Unanswered FM/FM call will be forwarded to NACF destination's Voice Mailbox.
6.1.2	The **ACD** system has been completely redesigned for QX50/QX200 FW 6.1.2. The **SMR** system isn't compatible with QX50/QX200 FW 6.1.2 and higher firmware. The replacement for **SMR** is the new **Epygi ACD Console** web application. **EAC** requires a software license key. **Note:** In general, most of the ACD configuration settings will remain while updating to FW 6.1.2 and higher. The ACD settings should be reviewed before and after the update as new fields will be added in FW 6.1.2.
	If an ACD Agent rejects a call by pressing the **Reject** button on the phone, then that call will not ring the agent's phone again within the **Queue Ring timeout** duration.
	When an ACD Agent receives a call, and doesn't answer within the **Agent Ring timeout**, the agent state will change to **Away**. Either the Agent or the Supervisor will need to change the agent's status back to **Online**.
	Added **Ring Duration** option for each FM/FM destination. The **Ring Duration** is used to select the ringing timeout of the destination.
	Loadlogo.cgi hidden page (for updating company details) has been renamed/ changed to **uploadlogo.cgi**
	Aastra IP phones (6730i, 6731i, 6735i, 6737i, 6739i, 6753i, 6755i, 6757i, 9143i, 9480i) have been renamed to Mitel (Aastra) 6730, 6731, 6735, 6737, 6739, 6753, 6755, 6757, 9143 and 9480.
	Polycom KIRK Wireless Server 300 and KIRK Wireless Server 6000 stations have been renamed to Spectralink KIRK Wireless Server 300 and Spectralink KIRK Wireless Server 6000 accordingly. **Note:** QX50/QX200 doesn't support the KWS's redundancy feature for these stations.
	The recommended FW versions for **Grandstream GXP14xx**, **2100**, **2110**, **2120**, **2124** have been changed from 1.0.4.9 to 1.0.6.7.
	The recommended FW versions for **snom 710**, **720**, **760** have been changed from 8.7.3.15 to 8.7.3.25.9.

Release	Changed Features
	The recommended FW versions have been changed for **Mitel (Aastra)** IP phones. For **6139** from 3.2.2.2088-SIP to 3.3.1.4305-SIP, for **6735**, **6737** from 3.2.2.7137-SIP to 3.3.1.8140-SIP, for **6730, 6731, 6753, 6755, 6757, 9143, 9480** from 2.6.0.2019-SIP to 3.3.1.4305-SIP.
	The recommended FW versions for **Aastra 6757iCT** and **9480iCT** have been changed from 2.6.0.2019-SIP to 3.3.1.2256-SIP.
6.0.13	The max number of Line appearance for **Cisco SPA525G2** is changed from **2** to**10**.
	New parameters have been added to Aastra IP Phones templates.
	The recommended FW versions for **Grandstream GXP2130**, **GXP2140** and **GXP2160** have been changed from 1.0.2.9 to 1.0.3.9.
	Changed the behavior for Polycom phone display in case of incoming calls to watched extensions. Show or not the call appearance/caller's ID on incoming calls to watched extensions is configurable now in the IP phones templates.
6.0.9	License key support for **Redundancy** feature.
6.0.8	Removed support for Polycom IP phones using the older 3.3.x.x firmware. This phone will need to be updated to the recommended FW.
6.0.2	

5 Fixed Issues

Issues fixed since version 6.1.41:

T: Title
D: Description

19853	T:	Unable to record a custom message on some pages using "Record from Extension" tool
	D:	

6 Known Issues

T: Title
D: Description
C: Consequences
Fix: How to avoid the situation, or what to do in case the situation has occurred

19894	T:	Automatic "Daylight Saving Time" doesn't work on Fanvil IP phones
	D:	
	C:	
	Fix:	Workaround: Create an IP Phone Template for Fanvil phones, select the "**manual**" option for "**Daylight Saving Time**". Attach this template to the IP lines for Fanvil phones. Will be fixed in future release by Fanvil.
19805	T:	The BLF indication (for programmable keys) on snom phones is switched off after the subscription timeout expires, regardless of the actual state of the BLF event
	D:	The issue appears on snom 3xx, 7xx, D7xx, 8xx series and MeetingPoint running **8.7.5.35** firmware version.
	C:	
	Fix:	Workaround: The issue is solved in snom 8.7.5.44 beta firmware.
19804	T:	Auto attendant hangs and stops responding when pressing a digit during the announcement message playing in custom scenario
	D:	
	C:	
	Fix:	Workaround: Disconnect the call and dial again. Will be fixed in future release.
19537	T:	ACD call recordings cannot be played from EAC when using the Mozilla Firefox browser
	D:	The Mozilla Firefox browser doesn't have native support for (***.wav**) audio format.
	C:	When you click **Play** instead of playing the recording, it will be downloaded.
	Fix:	Workaround: Install corresponding add-ons or use other browser (Chrome, Edge, etc.).
19463	T:	3-way conference doesn't work on Grandstream GXP1100 and GXP1105 IP phones in a specific scenario
	D:	3-way call conference cannot be established on Grandstream GXP1100 or GXP1105 phones when they receive a call.
	C:	
	Fix:	Workaround: Login into WEB GUI of the phone and assign 3-way conference key as a MPK. Use this key to initiate 3-way call conference when the phone is already in the active call. Will be fixed in future release.
19446	T:	After changing QX LAN IP configuration, the phones configured from LAN side lose registration
	D:	After changing QX LAN IP configuration (changing the network part of the IP address) the system doesn't reboot phones automatically.
	C:	IP phones lost registration.

	Fix:	Workaround: Reboot phones manually. Will be fixed in future release.
19329	T:	Outgoing calls through default PSTN routing rule cannot be established in a specific scenario
	D:	Scenario: QX E1T1 connected with QX IP PBX in share mode. After adding the PSTN access code from System Configuration Wizard on QX IP PBX, the default (9?* or 0?*) routing rule isn't added in QX E1T1's Call Routing Table.
	C:	Outgoing calls through the default (9?* or 0?*) routing rule cannot be established.
	Fix:	Workaround: Reboot QX E1T1 to resolve this issue. Will be fixed in future release.
18839	T:	It's not possible to park a call twice to the same call park extension by using programmable key on Yealink T32G and T38G
	D:	Upon successful call park/pick up the second attempt to park the call, using the park ext. programmable key fails. The problem is happening only if you park the call to the same park extension (by pressing Call Park key).
	C:	
	Fix:	Workaround: Park the call to different call park extension.
18577	T:	The voice traffic is not encrypted when using IPSec connection between two QX devices
	D:	
	C:	
	Fix:	Will be fixed in the next release.
18549	T:	Could not dial out (*1) or use any other moderator feature while welcome message has been playing
	D:	Could not dial out (*1) or use other moderator features while welcome message has been playing. You should listen to the whole welcome message first, after that use moderator features. It is recommended to keep the welcome message to a short duration.
	C:	
	Fix:	Will be fixed in future release.
18548	T:	Part of conference recording is lost after recording pause/resume
	D:	When pausing the conference recording and then resuming it again, the final recording contains only the part after resuming.
	C:	
	Fix:	Will be fixed in future release.
18397	T:	After changing the Time/Date Settings manually, it takes you to the QX login page
	D:	
	C:	
	Fix:	Will be fixed in future release.
17404	T:	Calls which are done using Call Relay (*2) on the auto attendant are not shown in Call History
	D:	Only the call to attendant is shown in the call history. The call leg after call relay is missing in the call history in case if the caller is terminating the call first.
	C:	
	Fix:	Workaround: Use feature code *1 instead of *2 for call relay. Will be fixed in future release.
16683	T:	Find Me / Follow Me does not work for incoming Secure RTP call
	D:	Though the call came with SRTP option the FM/FM is making unsecure calls.
	C:	As a result, the call is not established.
	Fix:	Will be fixed in future release.

16635	T:	Shared Mailbox watching does not work when using Allow access to Shared Mailbox for enabled extensions option in Many Extension Ringing configuration
	D:	Extension has **Many Extension Ringing** enabled with a few extensions configured for Shared Mailbox.
	C:	However, in the IP Line settings, the **Shared VMail Ext. xxx** option is not listed in the drop-down list on **IP Lines→MPK** page.
	Fix:	Workaround: Use the **Shared Mailbox: Edit Voice Mailbox Access List** link in the Voice Mailbox Settings for extension. Will be fixed in future release.
16533	T:	A problem with incoming Secure RTP call in a specific scenario
	D:	When incoming Secure RTP call is connecting to the destination via Call Routing table, QX200 always tries to connect it as an unsecure call and the call is being dropped due to the media parameters incompatibility.
	C:	
	Fix:	Will be fixed in future release.
15942	T:	It is not possible to pick up (via pickup group) the call to extension with FM/FM enabled
	D:	
	C:	
	Fix:	Will be fixed in future release.

7 General Hints

7.1 Technical Advisory

- When using **Call Recording** and/or **ACD** features on the QX50/QX200 it is advisable to use an SD memory card to expand the system memory. Currently, the recommended SD card's largest capacity is **32** GB.
- Always power down the QX50/QX200 before inserting/removing SD memory card.
- Some system information (Call History, Conference History and Pending Events) will be lost when QX50/QX200 is powered down. You may maximum lose the portion of the above-mentioned system information, which occurred during last hour before the QX is powered down. It's recommended to enable **Call History – Archiving** to minimize the loss of Call History.

7.2 Firmware Update

It is recommended to execute the update by downloading the firmware first to a PC located in the LAN side of the QX50/QX200 and perform the firmware update from the LAN side. This is to ensure that the Internet connection will not affect the upgrade process.

Attention: It is recommended to back up the configuration for **emergency purposes** prior to upgrading the firmware. You can do that from **Maintenance→Backup/Restore→Backup and download current Configuration** page. The current configuration will remain after the firmware update. Moreover, voice mails, call recordings, all custom messages and call history will be saved during the upgrade.

To perform the manual firmware update:

1. Go to the **Maintenance→Firmware→Manual Firmware Update** page.
2. Click the **Download Configuration** link to back up the current configuration (recommended).
3. Click the **Choose File** button to browse for **image.bin** file.
4. Click **Save** to start uploading the file.
5. Click **Yes** to proceed the firmware upgrade.

Note: The update process takes about 5 minutes. Normal operation will be stopped during that time.

7.3 Limitations and Restrictions

- The memory used by **Network Capture** hidden page is limited to **12** MB. This will put a limitation on the duration of captured file.
- The capture duration is limited to **160** seconds in **DSP Capture** hidden page.
- The **Call Capture** duration is limited to **160** seconds.
- In case if **voice mail recording codec** is other than **PCMU**, the maximum length of VM sent by email is limited to three minutes.
- The number of **VMs in the mailbox** for an extension is limited to **300**.
- **Use Session Timer** in IP Line Settings is deselected by default.
